Ken Onion Designs

Ken Onion, Custom Knife Maker

Kershaw Knives is proud to present a line of bold, new knives designed by Ken Onion, known throughout the industry as a custom knife maker of unique ability and skill. The designer of Blade Magazine's "1998 American-Made Knife of the Year," Ken began his quest to create the perfect knife many years ago as a Navy machinist. But it wasn't until he was working on a Harley cam for a friend that inspiration struck. The result was the Random Task Knife with its amazing, patent-pending "Speed Safe" mechanism incorporating torsion bar technology for safe, assisted opening. Now Kershaw Knives has joined forces with Ken to bring you an exciting, new array of Ken Onion "Speed Safe" designs.

- *Designed by custom knife maker Ken Onion*
- *Featuring "Speed Safe" mechanism with torsion bar technology for assisted opening*
- *To hold their edge longer, these models feature CPM-440V stainless-steel blades, with 55-57 Rockwell rating, or ATS-34 stainless steel with 58-60 Rockwell rating*
- *Corrosion-resistant 6AL4V Titanium liners offer lightweight, yet rugged construction*
- *Handsome, layered and polished G-10 handle is ergonomically designed to fit the hand perfectly*
- *Kershaw's "Net Finish" ensures flawlessly smooth fit and feel*
- *Includes removable pocket clip*

From his workshop in Hawaii, Ken Onion designs this exciting, new line for Kershaw Knives.

Weight - 1.6 oz.

KNIVES

Three handsome ways to put your name on our quality products

The Kershaw name ensures you uncommon craftsmanship for premiums and presentation gifts as well as for corporate awards and personal gifts. Embellish our Money Clip Knife or Keychain Knife–or other fine Kershaw knives–to make a memorable impression. For quality you'll be proud to award, there's no better choice than Kershaw.

Laser Engraving

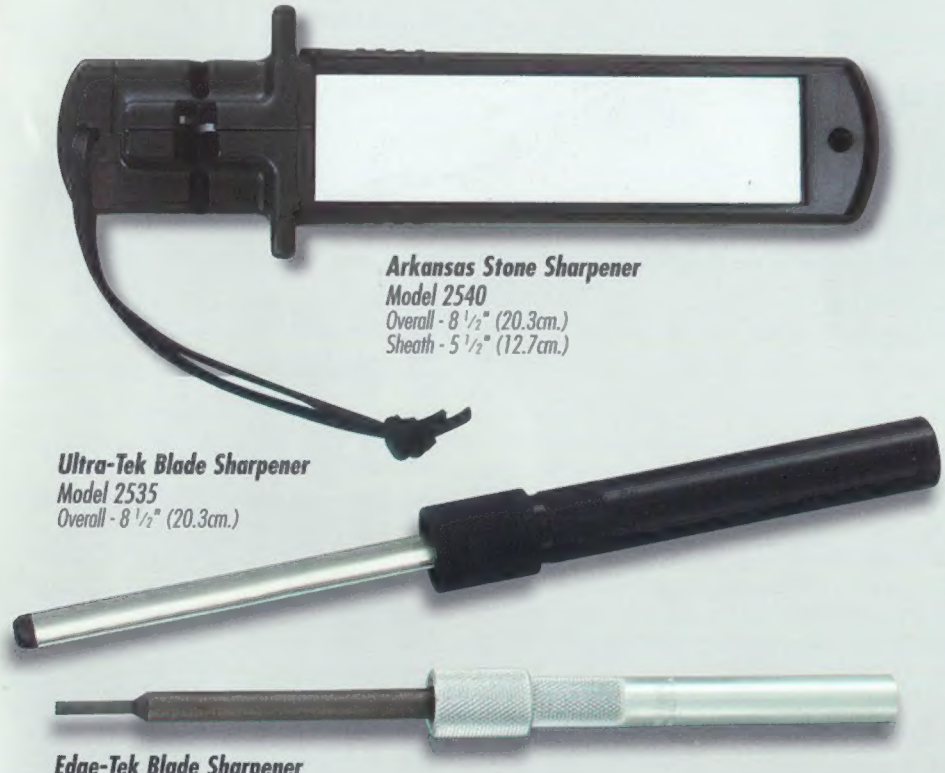
Our laser engraving process is computer controlled and produces rich, accurately detailed scenes, deeply cut into quality hardwoods. This type of engraving is ideal for intricate artwork and logos and has a dramatic look.

Classic Metal Engraving

Metal engraving accurately reproduces logos and symbols, as well as initials, names, and text in a variety of typefaces for a subtle–and classy–touch.

Electro-Etching

Electro-etching is a effective method for reproducing your logos or initials on stainless-steel blades or handles. Electro-etching stands out more than metal engraving for a bolder look.



Arkansas Stone Sharpener
Model 2540
Overall - 8 ½" (20.3cm.)
Sheath - 5 ½" (12.7cm.)

Ultra-Tek Blade Sharpener
Model 2535

Clam packs available on most Kershaw products

LIMITED LIFETIME WARRANTY

Kershaw products are guaranteed for the lifetime of the original owner to be free of defects when received from the factory. Any product we find to be defective in its original material, construction, or workmanship will be repaired or replaced with the same item or one of equal value at no charge. (Of course, normal wear, abuse such as prying with the knife, or neglect are excluded from this non-transferable warranty.) For warranty service, please return product via UPS or insured mail. Include your name, address, telephone number, proof of purchase (sales slip), and a short explanation of the warranty service requested to the address below.
